

Project Title: Insighta | Complaint Ticketing System

Project Start Date: February 20, 2026

Project End Date: March 11, 2026

Summary of Project:

Insighta is an AI-based non-life insurance complaint ticketing system developed as a secure web application for handling customer complaints and feedback. It supports complaint submission, ticket generation and tracking, AI-assisted classification and prioritization, staff handling, feedback collection, management reporting, and role-based security controls. The project aims to modernize complaint handling by improving speed, visibility, and service quality while also supporting data-driven management and regulatory compliance.

Project Outcome:

Upon completion, Insighta is expected to deliver a centralized and intelligent complaint management platform that enhances operational efficiency, improves customer experience, and provides actionable insights for management. The system will enable faster response times, better complaint prioritization, secure access to sensitive information, and improved monitoring of service quality through analytics and feedback data.

Project Sign-off:

By signing this document, the project client and project members confirm that the project has been completed to the satisfaction of all stakeholders.
